

Dyne Test Pens

Verifying treatment has never been easier than with our family of reliable test pens.

WEBCONVERT-Felt tipped dyne test pens available in even dyne levels from 32-58. (Blue test solution is standard)

WEBCONVERT-Dyne test solution kits (blue) available in all dyne levels from 30-70, in kits containing 11 bottles. Bottles are 50 or 100 cc in size.

WEBCONVERT-Jumbo test pens (unfilled), used in conjunction with the test solutions above.

WEBCONVERT-“poly test pen” and quick test pen-the ideal tool for film extruders and converters wanting to verify treatment. Both pens target #38 as the “go/no-go” target test level. Available pre-packed in quantities of 10.

Our Dyne Pens are Available From Stock
