

SUPPLIES FOR FLEXO & GRAVURE

RELIABLE/ECONOMICAL CLEANING SYSTEM FOR ANILOX ROLLS AND SLEEVES

VERY EFFICIENT:

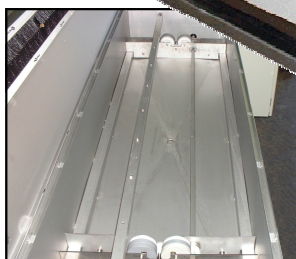

This cleaning machine uses our RECYL'COBRA or our RECYL'CLEAN 2000 sold worldwide for 15 years.

PROCEDURE:

- 1) Open the lid and place the anilox in the rotation system.
- 2) Put & lock the enducting blade against the anilox.
- 3) Pour a dose of cleaner between the blade and the anilox.
- 4) Close the lid and put the AC machine "ON".
- 5) Cleaning and rinsing operations:
 - Manual AC machine: leave the cleaner from 15 to 45 minutes, then rinse with the Kärcher.
 - Automatic AC machine (Cleaning + Rinsing): choose between the long or short cleaning program (15 or 45 minutes)

AC 1501 R

Open the lid.
Your anilox is ready!!

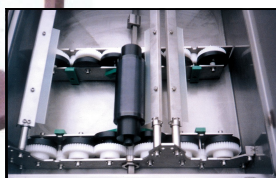

AC 703

ECONOMICAL:

Uses a very small quantity of product (30g/m²)

ECOLOGICAL:

Cleaning products biodegradable (RECYL'CLEAN 2000) or neutralized (RECYL'COBRA).

Required Power

CLEANING: Machine: 220V / 380V

KÄRCHER: 220V
